

Acer saccharum

Sugar Maple

Also called rock maple or hard maple because of the density of its wood. An absolutely beautiful tree, casting a dense shade. Majestic in shape and glorious in fall color, turning shades of orange and red. Bark on older trees has a lovely rich texture. Sensitive to air pollution and road salt.

Suggested companions: American beech (*Fagus grandifolia*), bitternut hickory (*Carya cordiformis*), black cherry (*Prunus serotina*), spicebush (*Lindera benzoin*), pagoda dogwood (*Cornus alternifolia*), serviceberry (*Amelanchier arborea*)
